CUSTOM TABLEWARE MADE EASY AND AFFORDABLE

Colorado Company Offers Tableware and tile With Your Design

LAKEWOOD, Colo. – The search for affordable custom tableware is over. Colorado’s Enduring Images offers residential and commercial buyers custom dinnerware at reasonable prices. Using a newly patented digital technology, Enduring Images provides clients the opportunity to purchase dinnerware and other ceramic products with their own unique designs or logos.

“We can help people create completely unique and personal pieces at reasonable costs, without requiring a minimum quantity order,” said Mary Beth Manwiller, CEO of Enduring Images.

The company’s products include porcelain, ceramic and bone china, printed with their customer’s own custom designs. All of the items are dishwasher safe, fade resistant, and can be created within a reasonable timeframe.

“Normally, to get custom tableware you have to find a company overseas. They will likely charge a premium, require a minimum order, and your dinnerware may take more than three months to arrive,” said Manwiller. “Enduring Images takes dinnerware orders of all sizes, serving items included, and customizes the pieces quickly and at a cost that people appreciate.”

“We can help people create completely personal pieces at reasonable costs,” said Manwiller. Restaurants, event planners, caterers, clubs and individuals who want to have their own design or logo featured on dinnerware find the Enduring Image products to be a quick and easy way to personalize a table.

In addition to creating custom tableware, Enduring Images has created personalized ceramic tile murals for both interior and exterior spaces including lobbies, bars, back splashes and outdoor facilities. Unlike other manufacturers’ products, Enduring Images tile is commercial quality, will not fade and is highly scratch and abrasion resistant.

Enduring Images was founded in 2003 and is creating a national reputation as a leader in personalized materials for the home and office.
